

SIDE EFFECTS MAY INCLUDE:

- Non-Watertight Fit
- Decreased Service Life
- Increased I&I

WORLD'S BEST EPOXY CIPP LINER SEALED WITH GASKETS!

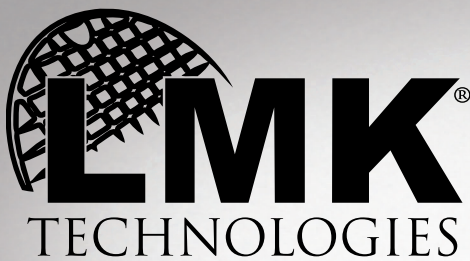

STANDARDS MATTER: ACHIEVE LEAKTIGHT SEWER LATERAL RECONSTRUCTION WITH ASTM F2561

Many professionals are specifying gasket seals with their projects, leading to a reduction in I&I and maximization of service life. LMK's minimal shrink epoxy liner outfitted with compression gaskets is the most advanced lateral liner in the world & stops infiltration and leakage permanently!

Insignia™ Gasket Seals are Available for:

- Lateral Connections (Connection Hat)
- Manhole Connections (End Seal Sleeve)
- Terminating Ends of Lateral Liners and Sectional Repairs (O-Rings)

Be sure your CIPP project includes a comprehensive ASTM F2561 compliant plan including compressive gaskets, so the *Service Life* of your CIPP matches the *Design Life*.
